SUPER ERECTA SHELF® HI-RISE SHELVING

- **Efficient Light-Duty Storage:** Designed to work with “man aboard” stock picking equipment for light-duty storage applications.
- **Increases Valuable Storage Space:** By applying Hi-Rise components to Super Erecta Shelf wire shelves, you can easily construct shelving to a maximum of 24-feet high — three times the height of conventional shelving — thus making use of available air space.
- **Open-Wire Construction:** Permits air circulation and light penetration, reduces dust and moisture accumulation, and insures maximum efficiency of sprinkler system.
- **Fast, Easy Assembly:** Double-staked posts connect together easily, using double-threaded bolts. Split sleeve assembly device locks shelves in place in 1" increments along the height of the posts.
- **Increased Stability:** Cross bar kits, wall brackets, post clamps, and foot plates are available to increase the stability of one or more units.
- **Metro™ Computerized Engineering System:** Assures correct specifications and load ratings of Hi-Rise materials for the application at hand.

All Hi-Rise applications must be reviewed and approved by InterMetro Engineering.

SUPER ERECTA SHELF®
HI-RISE SHELVING

The Super Erecta Shelf system can be accessorized with the components listed below to construct Hi-Rise shelving. See your Metro™ representative for details.

For ordering purposes, use Hi-Rise price sheet in conjunction with Hi-Rise selection guide.

Double-Staked Posts — Chrome-Plated

Length		Cat. No.
(in.)	(mm)	
13 ⁷ / ₈	356	HR13PC
33 ⁷ / ₈	864	HR33PC
53 ¹⁵ / ₁₆	1371	HR54PC
61 ¹⁵ / ₁₆	1575	HR63PC
74	1880	HR74PC
86	2184	HR86PC
96	2438	HR96PC

Double-Threaded Bolt
Cat. No. DTBZ

Cross bar Kit
Cat. No. HRCBN
(Not UPS Shippable)

Wall Bracket Kit
Cat. No. HRWBC

Hi-Rise Square Foot Plate
Cat. No. HRFPZ

S-Hook
Cat. No. 9995Z

Hi-Rise Top Cap
Cat. No. HRTCP

Post Clamp
Cat. No. 9994Z

NOTE 1: All Hi-Rise applications **must** be reviewed and approved by InterMetro Engineering.

NOTE 2: Hi-Rise **wire** shelving systems can be used specifically to store large amounts of lightweight parts, such as electronic components, small sub-assemblies, or finished goods. It is designed to work with "man aboard" stock pickers, but Hi-Rise is not designed to accommodate pallet racks, skids, or fork lift equipment.

NOTE 3: To protect the Hi-Rise system from damage by motorized material handling equipment, a floor-mounted steel guard is required.

NOTE 4: Hi-Rise uses wire shelves only.
