OPEN STARSYS™ SYSTEM Product Selection Guide

METRO'S OPEN STARSYS™ SYSTEM

Metro's Open Starsys System is a productivity focused, high-density transport and storage system that adapts to change and provides safe and comfortable access to the material it stores.

Open Starsys is designed to meet today's evolving requirements of material handling in both storage and transport applications.

Features:

- Interchangeable components
- *Shells available in 12 sizes*
- Optional "Full Extension" shelf
- *Optional enclosure kits*
- Accessories available
- *Units ship knocked down*

Benefits:

- Adapts quickly to meet rapidly-changing requirements
- Can be formatted into stationary storage stations as well as mobile transport systems to meet the exact needs of any facility
- *Use only the space required to store or transport desired parts or materials*
- Provides safe and comfortable access to parts and materials
- Increases storage capacity compared to standard shelving and carts
- *Protect contents*
- Provides configuration by need
- *Save shipping costs*

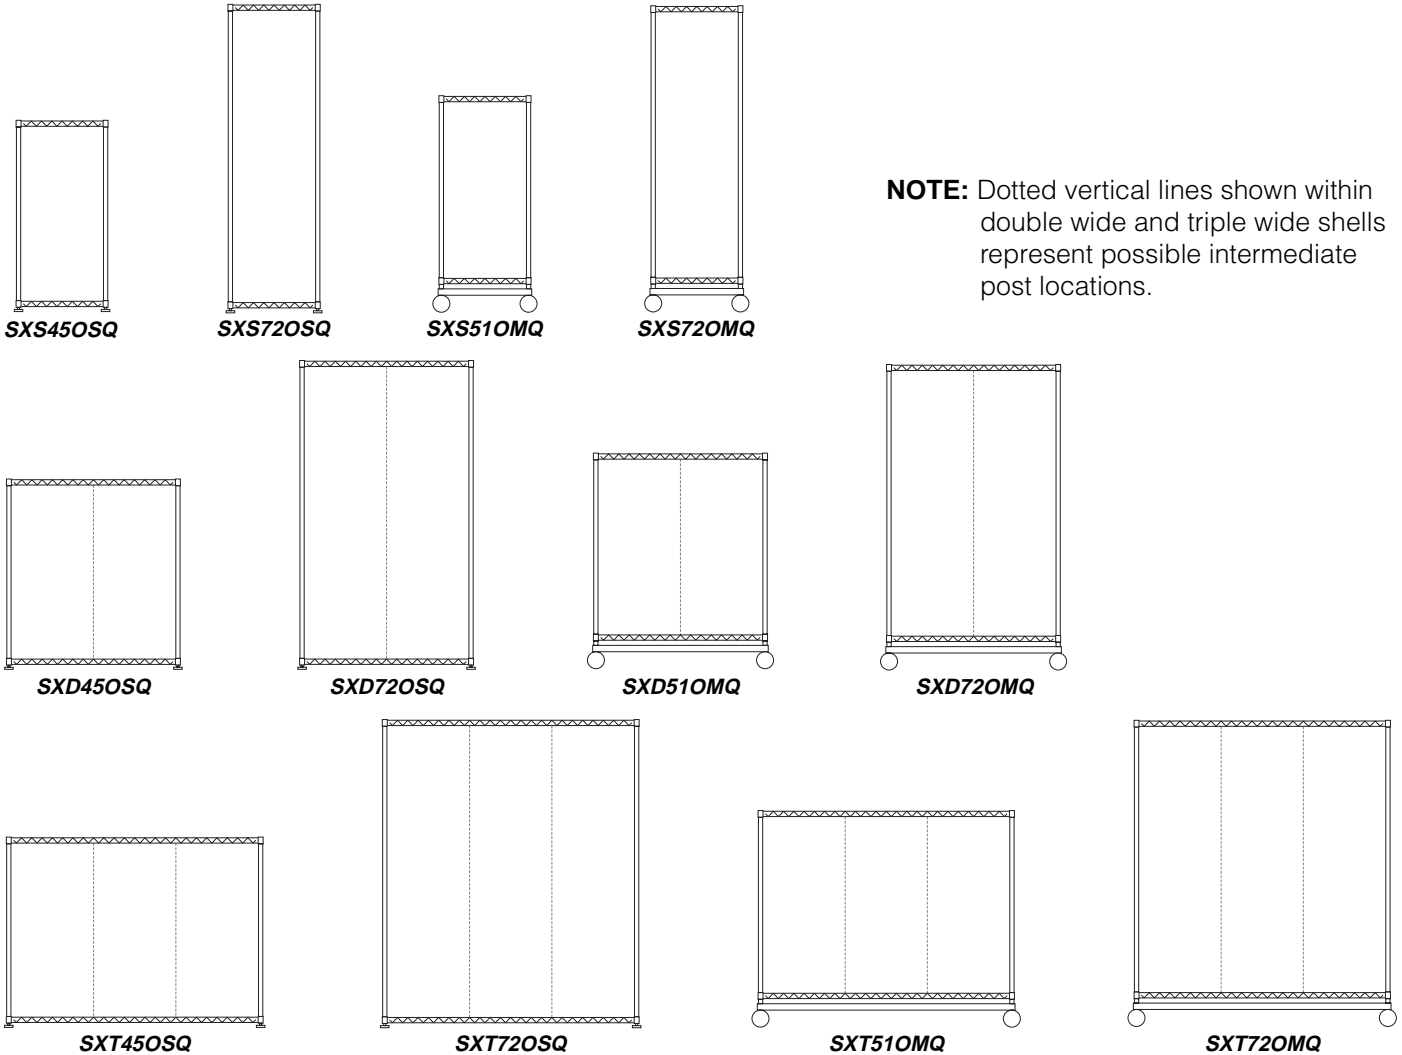

I. Select a Shell

Shells are available in single, double, or triple wide dimensions to accommodate interior shelves, either stationary or full extension. Select your desired shell from the 12 available models below. **Each shell comes complete with top and bottom wire shelves, posts with slotted inserts, footplates (for stationary models) or extended base with 5" (127mm) swivel and brake casters (for mobile models), and necessary hardware. Triple-wide units also include one pair of intermediate posts to create a single wide and double wide bay to accommodate available shelves.**

II. Select Desired Configuration

Double and triple wide units (SXD and SXT models) may be internally divided into vertical bays to accommodate single or double wide shelves as desired.

Two intermediate posts are required between each bay and come with appropriate mounting hardware. Select required intermediate posts as specified below:

- A** — One intermediate post required to enclose back of double wide unit if only double wide shelves are being used (2 back panels required).
- B** — Two intermediate posts required to divide double wide unit into 2 vertical bays that accommodate single wide shelves (2 back panels required if rear enclosure desired).
- C** — Two intermediate posts required as standard components with all triple wide units to segment into 1-single wide and 1-double wide vertical bay that accommodates single and double wide shelves as desired.
- D** — One additional intermediate post is required to enclose back of triple wide unit with back panels (3 back panels require).
- E** — Two additional intermediate posts required on triple wide units to segment into 3-single wide vertical bays that accommodate single wide shelves as desired (3 back panels required if rear enclosure desired).

III. Select Desired Shelves

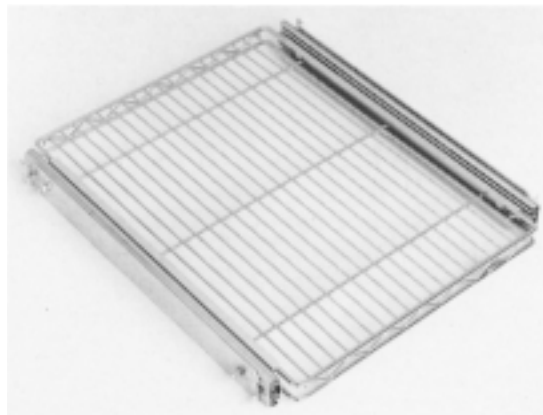

Shelves are available in stationary or full extension styles that can be installed at any location on a post within a shell at 1" (25.4mm) increments.

Stationary shelves include necessary mounting clips and **each full extension shelf includes one pair of shelf glides with a right-hand lock button** to prevent shelf movement while mobile.

Stationary and full extension shelves can be utilized together in the same shell.*
